Stewardship Thought

“And he sat down opposite the treasury and watched the people putting money into the offering box. Many rich people put in large sums. And a poor widow came and put in two small copper coins, which make a penny. And he called his disciples to him and said to them, “Truly, I say to you, this poor widow has put in more than all those who are contributing to the offering box. For they all contributed out of their abundance, but she out of her poverty has put in everything she had, all she had to live on.” Mark 12:41-44 ESV

Medical Missionaries Corner

"Satan gathered the fallen angels together to devise some way of doing the most possible evil to the human family. One proposition after another was made, till finally Satan himself thought of a plan. He would take the fruit of the vine, also wheat, and other things given by God as food, and would convert them into poisons, which would ruin man's physical, mental, and moral powers, and so overcome the senses that Satan should have full control. Under the influence of liquor, men would be led to commit crimes of all kinds. Through perverted appetite, the world would be made corrupt." **Satan's Master Plan - Ellen G. White, Temperance p.12**

Health Nugget

Factors beyond your control might contribute to high cholesterol: For example, your genetic makeup might keep cells from removing bad cholesterol from your blood efficiently or even cause your liver to produce too much cholesterol. **Age:** Because your body's chemistry changes as you age, your risk of high cholesterol climbs. As you age, your liver becomes less able to remove bad cholesterol. **Diabetes:** High blood sugar contributes to higher levels of a dangerous cholesterol called very-low-density lipoprotein (VLDL) and lower the good cholesterol (HDL). High blood sugar also damages the lining of your arteries. Reduce your risk high cholesterol: Eat more plant-based diet such as, whole grains, beans, nuts, vegetable and fruits.
